The Bachelor of Health Science (BHS) program is comprised exclusively of students pursuing careers in medicine, physician assistant, occupational therapy, physical therapy, speech pathology, nursing, and other allied health fields. Housed in the College of Public Health & Health Professions (PHHP), we are one of six colleges in the Health Science Center Complex and therefore steps from UF Health and Shands Teaching Hospital. Additionally, several allied health departments on campus are housed in the college including:

- Clinical & Health Psychology
- Occupational Therapy
- Physical Therapy, and
- Speech Language & Hearing Sciences

The curriculum is designed exclusively for students pursuing careers in health. As a student, you will take core courses on:

- US Healthcare System,
- Disease and Disability,
- Pathophysiology,
- Leadership Skills and Styles,
- Therapeutic Communications,
- Ethical and Legal Issues, and more.

Additionally students can take a variety of electives courses including non-science electives such as Substance Abuse or Pediatric Psychology, or science classes such as Musculoskeletal Anatomy where you are in the cadaver lab, or Nervous System Disorders and where you examine the dissected the human brain.

Over the past 3 years, the college has received nearly $84 million in grants, and its faculty are among the most productive at UF. PHHP faculty are working on research projects close to home and abroad on a diverse range of topics, including:

- Muscular Dystrophy
- Dementia
- Sports Concussions
- Driving Safety Among Older Adults
- Rehabilitation After Traumatic Injuries
- Suicidal Ideation
- Violence and Addiction
- Obesity
- Nutrition and physical activity, and
- Infectious diseases
